☐ Continuation Sheet Attached

Brief Description of Arguments to be Presented:

Biondi, alone or in combination with Breyer and Williams does not teach or suggest "sharing the data object among the multiple data sink objects to prevent extraneous copies of data," as recited in Applicants' claims. Biondi indicates that images can be sent to many destinations without teaching sharing the same data among the destinations. Biondi also fails to teach preventing extraneous copies of data. In contrast, according to the pending claims, the data object is shared among the data sink objects in order to prevent extraneous copies of data.

An interview was conducted on the above-identified application on 6/25/2009

NOTE:

This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP §713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.
